

Company profile

FWW is your partner in maintenance, repair, modification and production of vehicles and special equipment. We will perform our service at our facilities or at the customer's location. Furthermore we offer total technical-logistical service of complete vehicle systems with worldwide maintenance as well as training and spare parts support. Despite the general repair and maintenance of customers vehicles , FWW is able to persuade its customers with a wide range of special trades in its own facilities. Our sales department is specialized in selling fully overhauled used vehicles, special equipment and spare parts. The execution of all transport and export matters as well as a complete after-sales service is self-evident for us.

Sample of Service:

- Component repairs, especially engines, transmissions, axles and brakes
- NBC special equipment and component repairs
- Component and power systems repairs
- welding
- sand blasting
- spray painting

Beside the intensive care of the German market international customers are a focus of our business activities. More than 50% of our performance was spent for foreign partners. With this international performance FWW is an important factor for the growth of our economic region.

Partner of German Armed Forces

FWW is the regional partner of the German Armed Forces for the units stationed in the "former East German countries" and is seeking for a fair contract awarding in relation to the deployment of the units.

Offers

To be able to react fast on the requests of our customers FWW is holding in its stock approximately 200ea used trucks and special vehicles. This stock is permanently updated with former government vehicles according to our customer's requirements. Upon request we can support further special vehicles.

Spare parts

A spare parts stock with more than 2000tons of parts offers our customers

especially for armored vehicles a large inventory to keep his vehicle fleet reasonably priced operational.
